

1. On desktop, click on Start> All Programs> Microsoft Office> Microsoft Outlook 2010

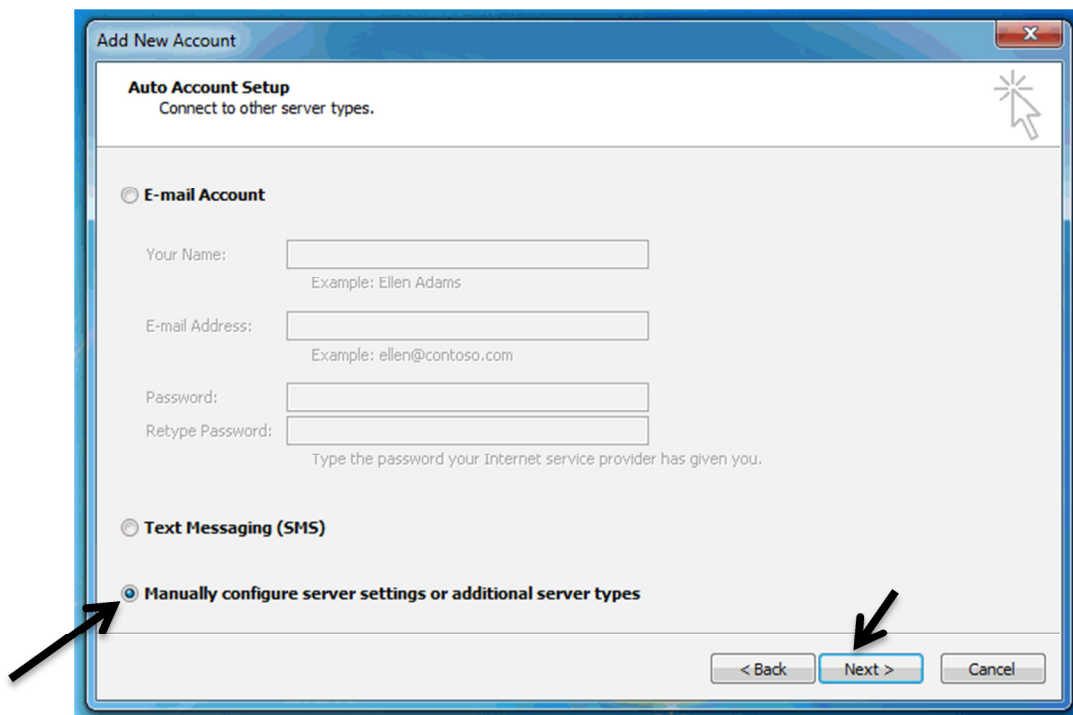

2. Click on Next

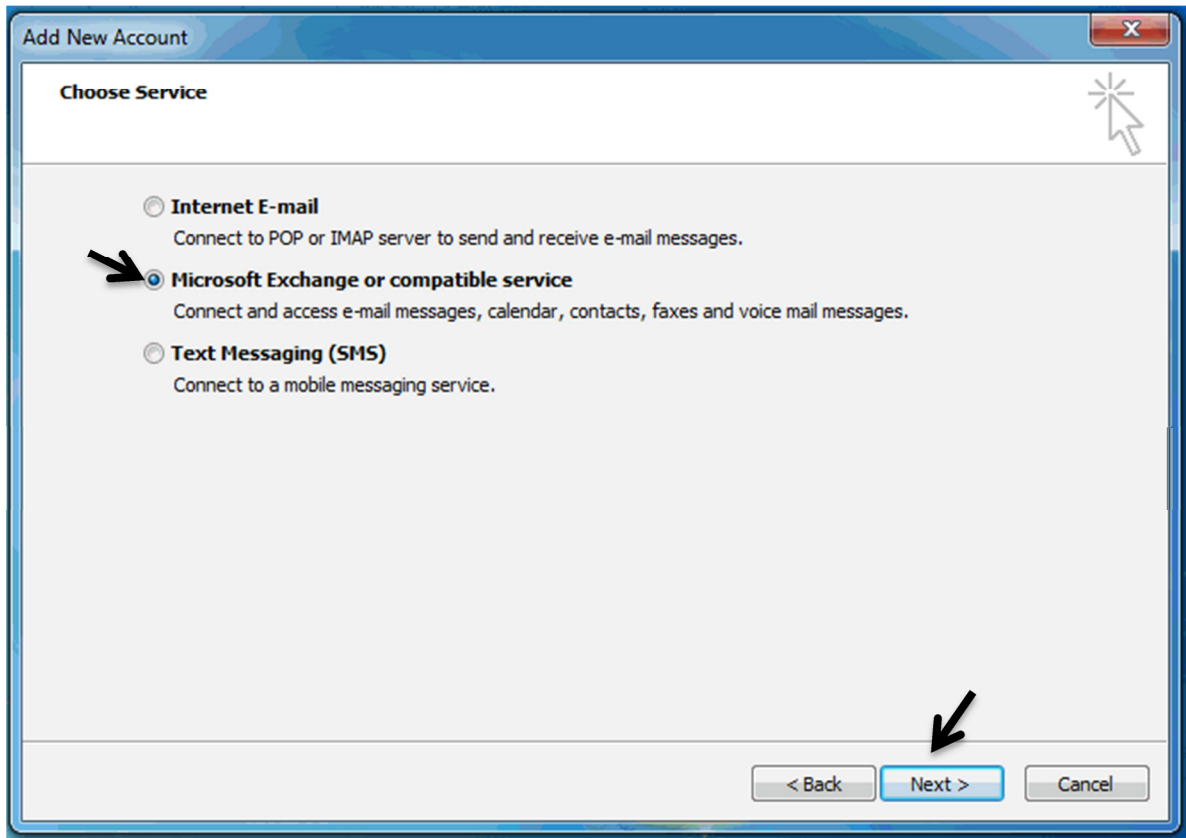

3. Click on Yes then Next

4. Click on Manually configure server settings or additional server types then Next

5. Click on Microsoft Exchange or compatible service then Next

6. To set Server and User Name:
- In Server field type in server name: **“webmail.alaska.gov”**
 - In the User Name field, type first initial, middle initial, and last name, all lower case with no spaces, then click Check Name. Example: For John E Doe the username is jedoe.

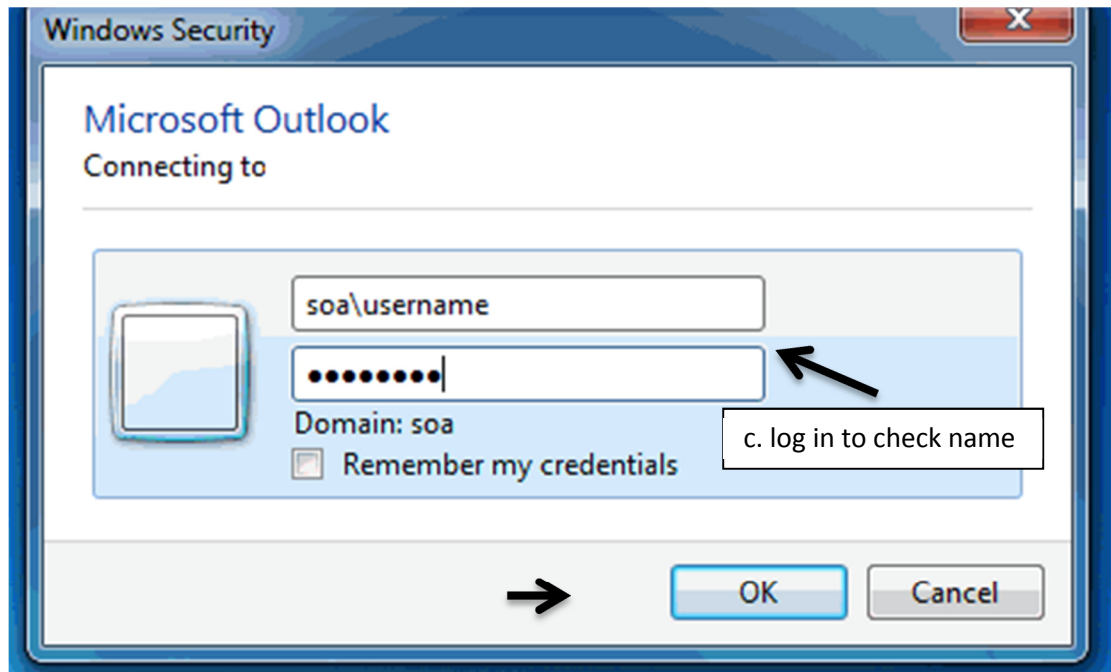

The screenshot shows a Windows-style window titled "Add New Account". Inside, there's a section titled "Server Settings" with the instruction "Enter the information required to connect to Microsoft Exchange or a compatible service." Below this, it says "Type the server name for your account. If you don't know the server name, ask your account provider." There are two input fields: "Server:" and "User Name:". The "Server:" field contains the text "webmail.alaska.gov". Below it is a checkbox labeled "Use Cached Exchange Mode" which is unchecked. The "User Name:" field contains the text "jedoe". To the right of the "User Name:" field is a button labeled "Check Name". At the bottom right of the window is a button labeled "More Settings ...". At the very bottom are three buttons: "< Back", "Next >", and "Cancel".

a. webmail.alaska.gov

b. USER NAME: jedoe

*****If you don't have state of alaska email user name call DMVA IT @ 428-7187*****

- c. After Check Name is clicked a Windows Security pop up window shows, type soa\username in the first field, Example: soa\jedoe. Then type your password for Microsoft Outlook in the second field then select OK.

- d. Verify your email address in User Name field and if email address is accurate then click Next.

Add New Account

Server Settings
